Guide to Natural Paving Colours

Natural stone is one of the most beautiful products for use around the home or in a commercial space.

Our paving is available in a variety of stones, sizes and finishes, which are all previewed in the following pages.

The colours we have detailed are as accurate as photography and printing processes will allow.

Tonal variations do occur in natural products so we would advise that you view our products either in situ at our showroom or at one of our stockists.

Colour Variation

Paving has an attractive natural colour and tone variation. However, some are more varied than others. Please see the chart on the right showing which paving has more, or less, colour variation.*

*Please note, this is a guide only. We cannot guarantee the exact paving colour tones.

Raj Green Patio Packs

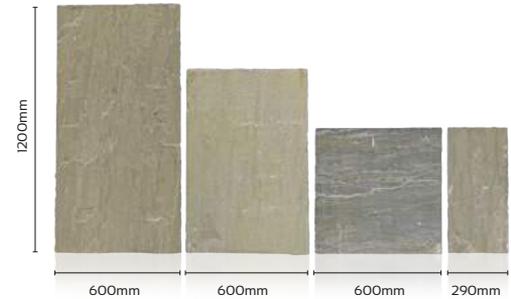

Raj Green Natural Sandstone Paving

Raj Green is one of our most popular colours and it is no surprise why. It blends with most surroundings and is a robust, hard, stone which will last a lifetime with appropriate care.

Raj Green is, as its name suggests, a mix of greens and soft browns. Occasionally, purplish tones run through the blend adding to the rich, traditional look of the stone. It is similar to reclaimed Yorkstone, having variations in colour throughout.

Raj Green paving is available in four single sizes. It is also available in our ever-popular RF7 Project Pack which offers a mixed pack of flags for laying random designs.

To complement Raj Green paving, we have many matching accessories, including cobbles/setts, circles, edgings, steps and walling.

Mint Fossil Natural Sandstone Paving

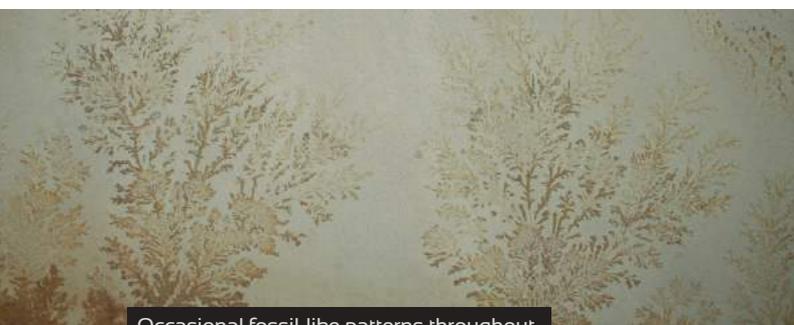

Mint Fossil is a colour which has an attractive variation in shades, from pale creams to bold honey tones.

As its name suggests, it has occasional fossil patterns throughout. These develop naturally as the stone is formed and positioned prominently the design will be enhanced.

Mint Fossil paving is available in three single sizes. It is also available in our ever-

popular RF7 Project Pack which offers a mixed pack of flags for laying random designs.

To complement Mint Fossil paving, we have many matching accessories, including cobbles/setts, circles, edgings, steps and walling.

Standard paving (22mm calibrated)

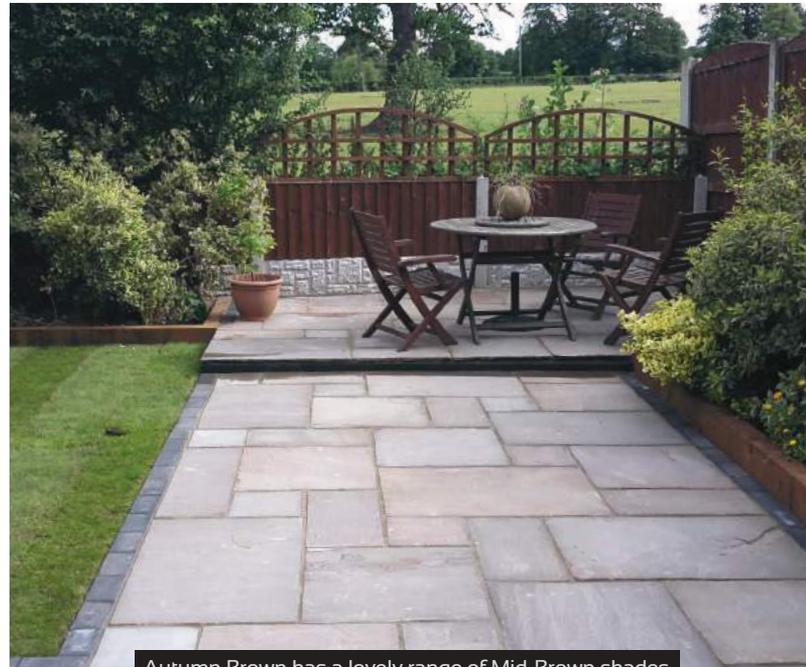

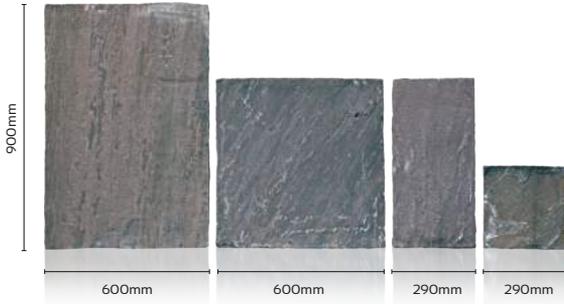

Autumn Brown Natural Sandstone Paving

Autumn Brown is a really mellow blend with mid-brown shades throughout. This gives the stone a warm, classic look.

Autumn Brown paving is available in three single sizes. It is also available in our ever-popular RF7 Project Pack which offers a mixed pack of flags for laying random designs.

Quite often the brown tones are further enriched by purplish shadings. This colour works extremely well with older properties and is the preferred choice of those who like the more reddish colour of Autumn Brown as opposed to Raj Green.

To complement Autumn Brown paving, we have many matching accessories, including circles, edgings and stepping stones.

Autumn Brown has a lovely range of Mid-Brown shades

Rippon Natural Sandstone Paving

For a really multi-coloured paving style, we have several options, namely Rippon, Modak and Raveena.

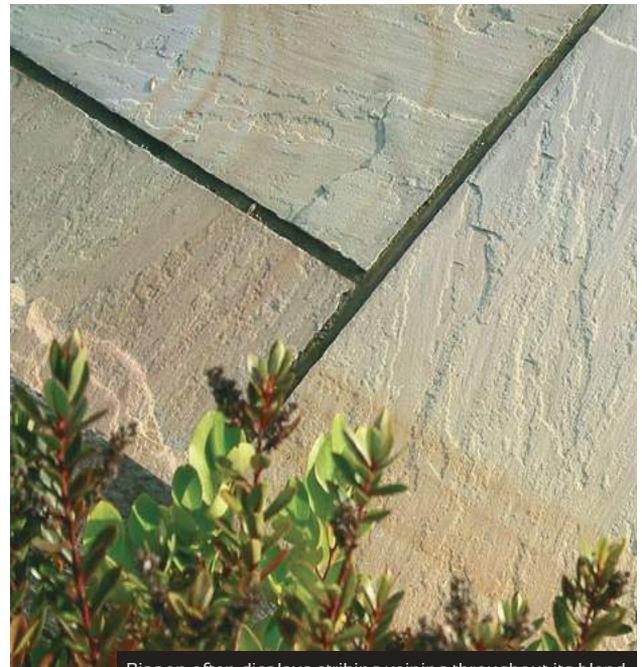

Rippon is an attractive mix of colours set against a buff background, frequently having striking veining through its blend.

Rippon paving is available in three single sizes. It is also available in our ever-popular RF7 Project Pack which offers a mixed pack of flags for laying random designs.

Rippon is also available in circles, which can be used to complement paving, or alone to create a feature.

Standard paving (22mm calibrated)

Lalipur Yellow Natural Sandstone Paving

If you like the darker tones in Mint Fossil, then this colour may be ideal for you.

Lalipur Yellow is a rich, mellow, golden colour throughout, with little variation. It is a distinctive choice and blends well with many of our decorative aggregates, particularly Golden Gravel and Autumn Gold.

Lalipur Yellow paving is available in three single sizes. It is also available in our ever-popular RF7 Project Pack which offers a mixed pack of flags for laying random designs.

Kandla Grey Natural Sandstone Paving

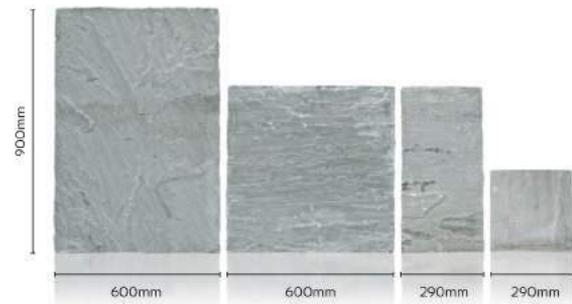

Of all the sandstones, **Kandla Grey is one of the most popular, being very consistent in colour with minimal colour variation.**

It is a soft blue-grey colour with occasional beige shading.

Kandla Grey is available in three single sizes.

It is also available in our ever-popular RF7 Project Pack which offers a mixed pack of flags for laying random designs.

To complement Kandla Grey paving, we offer corresponding circles, cobbles and edgings.

Perfect for those looking for little colour variation

Kota Black Limestone Paving

Unlike the riven look of sandstone, limestone paving has a flatter, smoother finish similar to orange peel and is very regular in depth, making it perfect for use indoors.

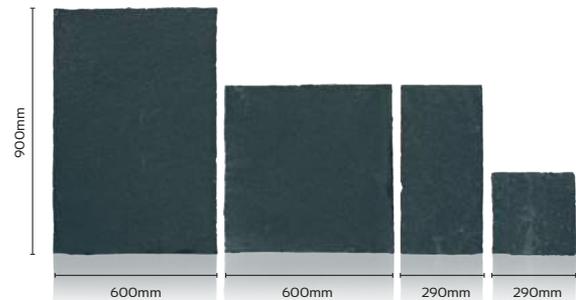

The black shade is particularly stunning, being exceptionally consistent in colour.

When newly quarried, the deep black colour eventually fades in natural sunlight to charcoal grey, but when wet it will always revert to a jet black colour.

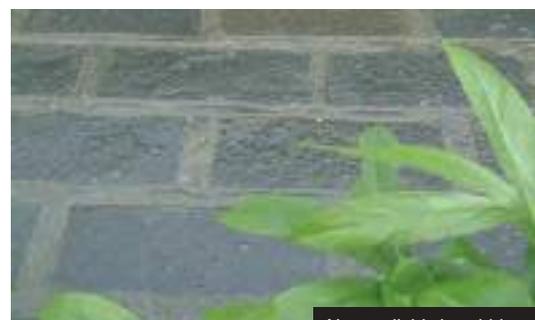

To maintain the darker tone, it is possible to seal the stone with a colour enhancer. Please ask for details.

Kota Black is available in three single sizes. It is also available in our ever-popular RF7 Project Pack which offers a mixed pack of flags for laying random designs.

Kota Black Limestone is also available in cobbles/ setts and circles, which complement limestone and sandstone colours.

Kota Blue Limestone Paving

Unlike the riven look of sandstone, limestone paving has a flatter, smoother finish similar to orange peel and is very consistent in depth, making it perfect for use indoors.

Kota Blue is also a great alternative to slate in the home. Many of our customers have chosen this stone for kitchens, and commercially it has been used in bars, restaurants and car showrooms.

Kota Blue Limestone is an attractive and consistent shade of slate blue and it works well when mixed with black limestone accessories such as cobbles, used for edging a paved area.

Kota Blue is available in three single sizes. It is also available in our ever-popular RF7 Project Pack which offers a mixed pack of flags for laying random designs.

Italian External Porcelain (20mm)

Laying on Screed with Adhesive

The advanced technical features of the 2 cm-thick K2 collections, combined with an adhesive laying technique in screed, allow users to create perfectly stable and exceptionally hardwearing surfaces. The K2 slabs used with this solution can withstand both moving and parked vehicles. Ideal for heavily frequented city areas, in particular for squares, pavements, or cycle paths.

Supports with a fixed height

The fixed support allows outdoor raised floors to be laid with a minimum height from the floor of 12mm. A 3mm levelling disc is available if one or more sectors of a support need shimming.

The supports feature a base with a hole in the centre to adapt to the laying surface. They are made up of a single piece that can be easily divided into four parts according to the laying solution required. In addition they feature four spacers for joints between the slabs.

The outer row of tiles and those near the corners can be laid by breaking the support along the pre-scored lines on the base, as shown in the figure below.

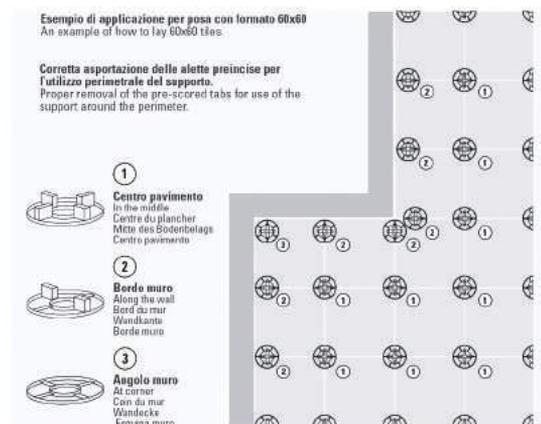

Adjustable Paving Support with a Rotating Fixed Head

The support is designed for use on all surfaces, allowing inspection of the underlying systems without the need to demolish the floor. The adjustable support with rotating fixed head allows height adjustments using the special key, without having to remove the laid floor, thus guaranteeing great savings in terms of time and cost.

For laying near walls or corners two or all four spacers on the head of the support must be broken off. When laying near corners, the supports must be moved away from the wall and positioned inside the perimeter of the slab. These are available in three adjustable heights:

- ✓ 25-40mm
- ✓ 40-70mm
- ✓ 60-100mm

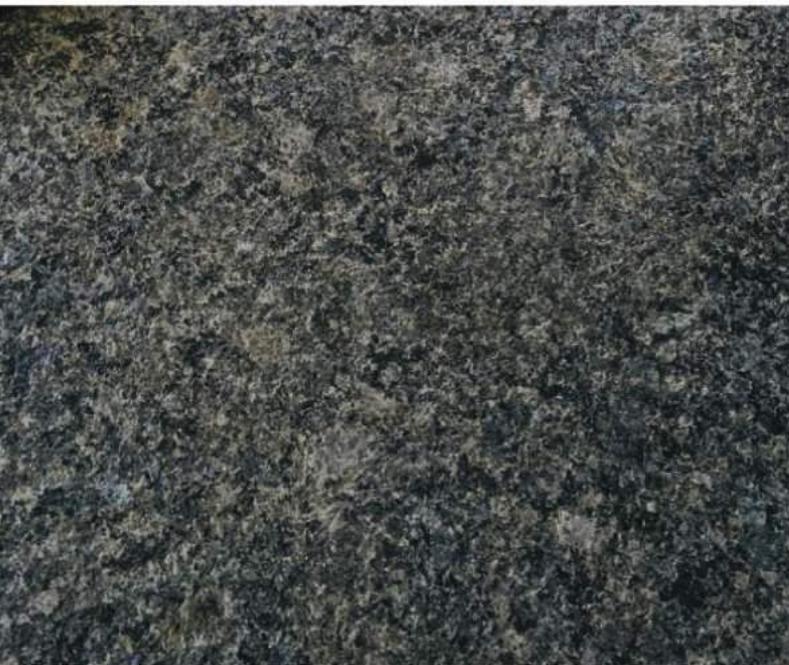

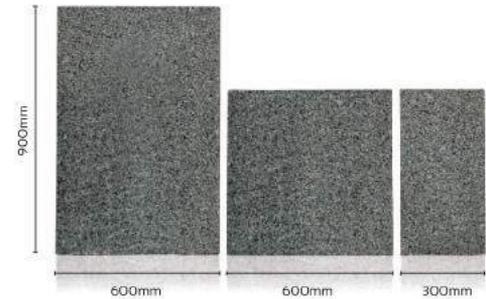

Dark Grey Granite Paving

For a totally different look, why not try granite? As well as providing a contemporary look for the home, it is ideal for commercial properties such as cafés and restaurants, shops and bars.

Dark Grey Granite's many qualities are particularly stunning. Its surface is flamed to produce a durable, anti-slip paving stone which is essential for public areas.

Each paving stone is calibrated to 20mm depth, with the edges machine cut for a straight edge. It is available in three single sizes which can be purchased separately or as a mixture to create a random pattern.

Flamed Granite Paving is also available in Light and Medium Grey.

Natural Stone Granite Table Set

This delightful pure granite all-weather set, consisting of a round granite table top which sits on a granite pillar, together with four curved benches, is ideal for all gardens.

Made using polished Light Grey granite, the set is very low maintenance, will not discolour or deteriorate and consequently can remain outdoors all year round.

Stone Granite Benches

This stunning Light Grey granite bench is made from 100% pure granite and would be a beautiful addition to any garden. The 16 squares on the bench top have not been polished and are therefore lighter in colour.

Stone granite benches are low maintenance; they do not rot, weather or deteriorate during adverse conditions and as a result they will look just as beautiful in the winter as they will in the summer.

Measurements (mm)

Circular table top diameter: 80cm
 Table top pillar height: 64cm
 Curved bench outer ring: 96cm
 Curved bench inner ring: 68cm
 Bench width: 8cm x 5cm height
 Bench pillars: 36cm height

Measurements (mm)

Length: 1.2 metres
 Width: 350cm
 Leg height: 450cm
 Leg width: 200cm
 Bench top alone height: 50cm

Sealant

A sealant is a fantastic way of protecting any natural stone product.

This sealant is a hardwearing, durable, abrasion-resistant, clear sealer for both interior or exterior use. As it is also a colour enhancer it amplifies beautiful colour variations. After spending hard-earned cash on your dream patio or interior décor, you want to protect this and make it last as long as possible.

Our sealant is an excellent product; unlike water based products it will last the lifetime of the stone. It seals and protects stone and also concrete.

Choose from a Matt or a Gloss finish. Depending on the porosity of the surface, coverage is generally 2 square metres per litre using two coats. Depending on temperature, each coat should dry within 1-2 hours. Please leave this time between each coat for an optimal result.

For more information, please give us a call. Data sheets and/or Product Information sheets are available on request.

-  Available in 5L tub
-  Available in 10L tub
-  Available in 20L tub

Sizes available

- 5 L (10 sqm coverage - 2 coats)
- 10 L (20 sqm coverage - 2 coats)
- 20 L (40 sqm coverage - 2 coats)

Sealant advantages

- There is minimum surface preparation needed and it is quick and easy to apply.
- It is fast drying, creating minimum disruption.
- It is resistant to detergent, oil, diesel, food and drink stains, acid and alkali.
- The stone can be easily cleaned.

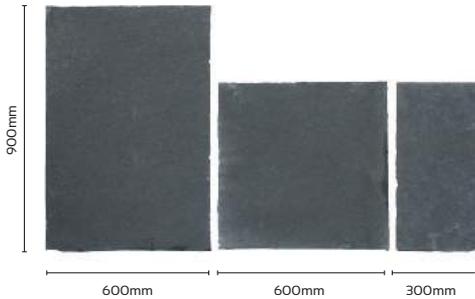

Black Slate

This slate is a slightly riven product that is pure black. It is incredibly consistent in colour and offers an alternative to both our Sandstone and Limestone product lines.

Black Slate is 22mm calibrated, with the edges machine cut for a straight edge.

It is available in three single sizes which can be purchased separately or as a mixture to create a random pattern.

We also offer Black Slate in our ever-popular RF7 project pack. This pack offers four different sizes to create a random pattern.

Calibrated (50mm)

Cobbles/Setts can offer an attractive and very durable surface for driveways and also complement areas of paving. Our Light Granite Cobbles/Setts perfectly complement and/or contrast with our three Granite colour ranges.

If an exact colour match is required, choose our Light Grey Granite Range.

Our Dark Grey Granite Paving together with these cobbles offer a complete contrast, resulting in a clean and contemporary look.

These particular cobbles are sawn edged for precision. They are then calibrated to approximately 50 mm allowing for 2-3 mm.

Also available in calibrated cobbles

Cobbles/Setts

Hand crafted (40-60mm)

Cobbles/Setts can offer an attractive and very durable surface for driveways and also complement areas of paving.

Each cobble/sett is hand chiselled and cut to 40-60 mm in depth.

Our hand crafted cobbles/setts are available in six different colours.

They can be used to edge circles, patios and flower beds and are very useful for awkward spaces, when cutting paving stones can prove difficult and the result would look unattractive.

Cobbles/Setts Calibrated (30 or 50mm)

Our calibrated cobbles/setts are designed with ease of fitting in mind.

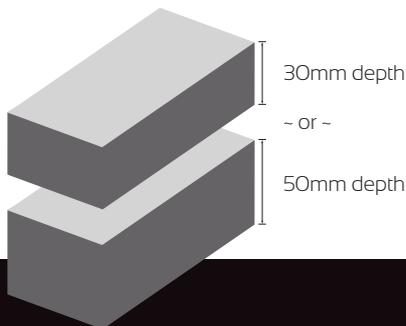

Each cobble/sett is cut to 30 mm or 50 mm thickness and sawn to size, prior to being tumbled.

For commercial installations, our 50 mm range is ideal. The extra depth is designed for areas that may be subject to excessive use, such as farmyards, street paving and car parks.

Edging Stones

Our edging stones ensure that your new calibrated cobbles/setts are kept solid and sound for many years.

With a sawn and tumbled edge, an edging adds a touch of elegance to your finished design.

Accessories

Natural stone

Stone is such an attractive substrate that even if you don't need paving or walling, you can still use stone to great effect in the garden.

We have a large selection of natural stone accessories from spheres and troughs to perfect landscape finishers, such as kerb stones and steps, which can really contribute to an impressive garden design.

Our stone is easy to power clean. However, in many cases, many garden accessories such as these look all the better if left to age naturally. However, the application of a weak solution of natural 'bio' yoghurt can accelerate the 'ageing' process, making an inexpensive piece of stone from our range look like it has been in its new home for centuries!

Sandstone Block Steps

When wet the colours are enhanced

Our Sandstone Block steps are substantial pieces of stone, hand cut to be used as steps or edgings. They are sawn edged and shot blasted resulting in a flawless appearance. The Sandstone colour of these steps is Raj Green.

Available in (mm):
1000 x 350 x 150

Stepping Stones

Available in (mm):
380 x 560 x 30 (approx)
Mint Fossil, Raj Green, Autumn Brown, Lalipur Yellow, Kandla Grey, Rippon

Sandstone Spheres

Available in (diameter):
200mm (8") approx.
250mm (10") approx.
300mm (12") approx.
350mm (14") approx.
Teak

Sandstone Troughs

These handcrafted sandstone troughs complete with drainage hole are excellent for planting. They are perfect for purpose and are an ideal way to complete a fabulous looking design.

Available in (mm):

- Large – 900 (L) x 300 (W) x 310 (H)
- Medium – 600 (L) x 300 (W) x 240 (H)
- Small – 600 (L) x 270 (W) x 170 (H)

Stone Copings

They are calibrated to 50 mm thickness, are naturally riven, and have hand cut edges.

Available in (mm):

- 320 x 560 x 50
- 420 x 560 x 50
- Mint Fossil, Raj Green

Kerbs/Edgings

Calibrated to 50 mm thickness and ideal for driveways.

Available in (mm):

- 1000 x 200 x 50
- Mint Fossil, Raj Green, Kandla Grey

Railway Sleepers Reclaimed

As one of the leading importers and suppliers of railway sleepers in the UK, we can supply anything from one sleeper for a garden project, to a full load for commercial projects or for retail outlets.

Reclaimed sleepers are graded into two main classifications, namely Grade 1 and Grade 2.

Grade 1 have the fewest cracks and are the straightest lengths. Grade 2 by definition are slightly lower grade.

However, many projects do not require Grade 1, such as retaining walls, load bearers etc., so Grade 2 is ideal and slightly lower in price.

Reclaimed sleepers have numerous uses, but it is worthy of note that if the sleepers are to be in constant close skin contact, such as for seating or for raised beds, then you are better advised to utilise new sleepers (see page 33).

New Oak: Perfect for raised flower beds

Reclaimed

Straight cut with occasional bevel edges

Reclaimed rustic appearance

Driveway edging

150-160mm thickness

Heavy product

Ideal for edging driveways

Packs and single sizes available

Railway Sleepers

New

New Oak Hardwood

Straight cut with occasional bevel edges

Tanalised Softwood Green or Brown

Straight cut

Ideal for raised beds and children's play areas

Suitable for interior and exterior use

Heavy product

Ideal for edging driveways

With the limitations on the use of reclaimed sleepers, newly sawn timber sleepers have become increasingly popular.

As leading suppliers of sleepers, we have risen to the challenge and stock three core ranges, namely Softwood, Oak, and Exotic Hardwood.

Tanalised Softwood Sleepers are available in two colours: green and brown. Because the wood is not as dense, it is treated with a coloured preservative to lengthen its lifespan.

Being much lighter (around 55 kg) than the new Oak equivalent, Softwood Sleepers are easy to handle.

Large stock

Single sizes available (mm)

Reclaimed (Grade 1)
150 x 250 x 2600

New Oak Hardwood

Packs available

Reclaimed (Grade 1 and 2)
Average 20 Sleepers per pack

New Oak Hardwood
Average 25 Sleepers per pack

Tanalised Softwood
Average 30 Sleepers per pack

Sandstone Roofing New Range!

We are delighted to introduce our new range of sandstone roofing. For some time, we have supplied roofing to clients on a 'special order' basis, however we have now designed a full range of sizes which will now be a stock item.

Each roof tile is designed to fit a diminishing course pattern which will give your roof a quality appearance, using quality stone cut exactly for the job.

Full Design Services

We have teamed up with Over & Above (The Roof Supply Co) and their planning expertise to be able to offer you with each order, a complete design for the roof tiles. This includes a batten schedule based on the spar and ridge measurements, a pattern for the roof tiles and a complete square meterage calculation.

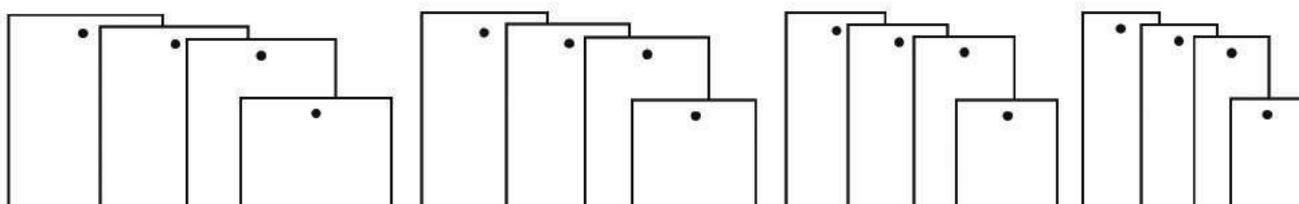

Reduced Wastage

Because we carefully calculate your requirement and our comprehensive selection of roof tiles fit for purpose, then there is very low product wastage. Despite being the same type of stone as our paving range, these are NOT PAVING SLABS, but calibrated, hand selected tiles for the purpose of roofing.

Fully Calibrated Product

Each tile is machine calibrated to 22mm and therefore each row will lie extremely well on the roof. They can be used with or without a water table finish to the edges of the roof. However, should you wish not to have a water table, then the weight of the tiles will be sufficient to resist lifting in heavy winds. They are lighter than the unpredictable reclaimed roofing and similar in weight to reproduction stone roofing therefore there is no need for upgrading of roof timbers.

Diminishing Size Guide

Fast and Efficient to Lay

With the pattern already planned by us and the tile sizes already designed to fit the plan, then the roofer need spend little time cutting and more time laying down the roof. With the batten schedule supplied and the roof tiles supplied in crates direct to site, then our service starts to make life so much easier.

22mm
Calibrated thickness

Stock Item

We can work with architects and provide samples for planning applications.

We import all the sandstone roofing products and Over and Above - The Roof Supply Company are the UK sole agents, please see below for their contact details.

Aggregates

Decorative stone such as chippings, gravel or cobbles, can really finish off a design.

They can be used between paving or for complete driveways and paths. A great effect can be achieved by using decorative stone as a mulch in dry plantings, which has the added

advantage of suppressing weeds and conserving moisture.

We have many colours and sizes on offer; aggregates shown below are available in a 25 kg bag or an 875 kg bulk bag.

Each bulk bag will cover an area of approx. 11 m² at 50 mm depth.

Cheshire pink
(14mm)

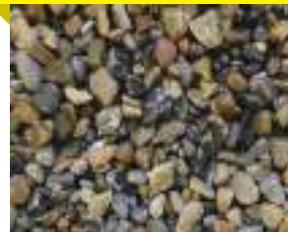

This very popular aggregate has a mix of rounded and angled stones which gives a look of multiple textures within one gravel. The shades of pinks, greys and purples make this a very attractive and decorative gravel.

Dales Gravel
(20mm)

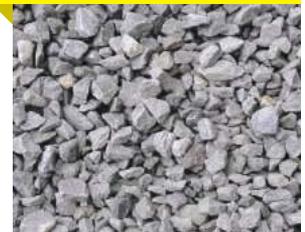

This gravel is made up of sandstone and is perfect if a neutral look is desired. Dales Gravel is multi-coloured and features different angled and rounded stones. Its size range is 10 mm-20 mm.

Pea Gravel
(10mm)

Pea Gravel's beautiful colour variations of browns, blacks and whites ensure it blends with any existing planting scheme. Its size gives it excellent drainage properties and its shapes are mainly rounded.

Dove Grey Limestone
(10mm)

This particular aggregate consists of Carboniferous Limestone and is very hardwearing. It provides a fantastic look for any backdrop or garden and is also ideal for footpaths and rockery projects. This size variation is 6 mm to 10 mm.

Dove Grey Limestone
(20mm)

The 20 mm aggregate has the same properties as the 10 mm. However, this thickness is better suited to large area projects. The gravel consists of Carboniferous Limestone and perfectly suits our RF Kandla Grey Sandstone Paving.

Golden Gravel
(10mm)

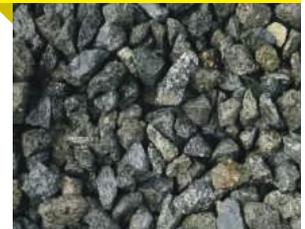

This particular gravel (rock type Marine Flint Shingle) consists of an attractive blend of colours and angular shapes.

Golden Gravel
(20mm)

Golden Gravel is popular because of its attractive blend of colours and shapes. Its rock type is Marine Flint Shingle and its size variation is 10 mm-20 mm.

Green Granite
(14-20mm)

If you are looking for something a little bit different, this product may be perfect for you. It is ideal for planting schemes as it is very dark green when wet, drying to a light green.

Horticultural Grit

Horticultural Grit, made up of Quartzite, has excellent drainage properties. It is an ideal product for damp areas or around water features. This product can be used as a permeable layer or joint fill in block paving applications.

Moonstone
(20mm)

This product is made up of mainly black and white colours with a small number of browns throughout and is ideal for any landscaping project. The rock type of this product is mixed but predominantly Flint.

Nordic Granite

This a very durable and angular product. This product is Green, Grey and Black in appearance with a hint of white and pink.

Polar White
(8-11mm)

This aggregate is an angular bright white product with some greys and pinks throughout and is ideal for enhancing gardens. The rock type is Dolomite.

Pink Granite
(20mm)

Pink Granite is a beautiful product being pink with black and silver flecks. It is very durable, making it fit for purpose.

Scottish Red Granite
(14mm)

This product is ideal for driveways, car parks and pathways due to the inherent strength of the stone. This guarantees that the product will withstand all modes of traffic.

Tweed Pebbles
(20mm)

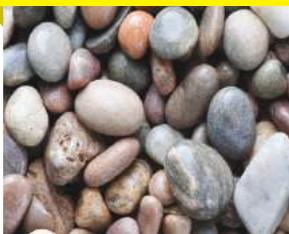

Tweed Pebbles (mixed Quartzite and Granite) are a multi-coloured rounded gravel. They are very hardwearing and ideal for all home and garden applications.

Yorkshire Cream
(20mm)

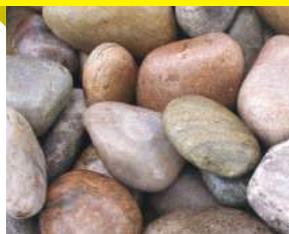

This product is ideal for large areas of ground coverage. The colours are a mixture of creams and browns. The rock type is a mixture but mainly Flint.

Scottish Pebbles
(20-30mm)

The irregular shapes, sizes and colours of these Scottish Pebbles, rock type Granite, adds to the traditional feeling of an informally designed garden. These pebbles have soft rounded edges making them perfect for a water feature.

Scottish Cobbles
(50-80mm)

Traditional tumbled cobbles are a variety of colours which ensures they fit in well with any garden colour scheme. Scottish Cobbles are ideal for water features or to highlight a particular part of the landscape. Its rock type is Granite and its size variation is 50-80 mm.

Scottish Cobbles
(80-100mm)

These traditional tumbled cobbles, from Granite, are a variety of colours and will blend in with any landscape. They are ideal for water features because when wet their colours are beautiful. Sizes are from 50-100 mm.

Oyster Pearl Pebbles
(20mm)

Oyster Pearl Pebbles are a mixture of rounded pebbles of assorted colours. They are suitable for ponds, flower beds and pathways and will look beautiful in any garden or landscaping project.

Polar White Cobbles
(40 - 90mm)

This product is naturally rounded and will make an instant impact in any garden. The colour is mainly white with some grey shading. Polar White Cobbles' rock type is Dolomite.

Blue Slate Chippings
(40mm)

Our Blue Slate Chippings are ideal for all contemporary projects. Blue is an uncommon slate colour, therefore including it in your garden scheme can present a very distinctive look.

Green Slate Chippings
(40mm)

Our Green Slate Chippings will naturally enhance the look of plants or shrubs and are ideal for using in borders. As with all slate this product becomes vibrant when wet.

Plum Slate Chippings
40mm

Plum Slate Chippings add an intense colour to any garden or landscaping project.

Costwold
(20mm)

The creamy buff colour of Cotswold Chippings can be placed in either a modern or a traditional setting. The hard angles of the stone help to bounce the light, making these chippings ideal for brightening up a dark or shaded area of a garden.

Black Basalt
(10mm)

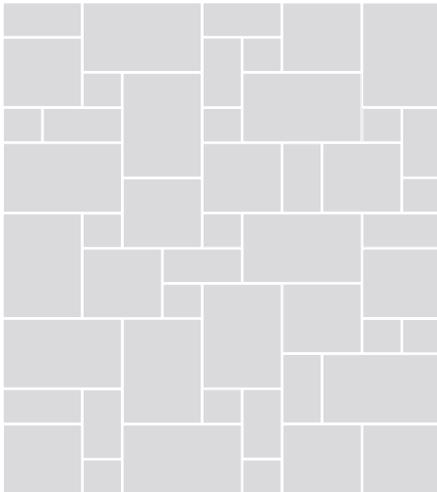

Black Basalt is very black when wet. However, when this product is dry it is more of a charcoal grey colour. This gives the product character and the ability to fit in with a natural setting.

How to lay Natural Paving

(Wider at top)

Disclaimer

Attention

Our stone is a Natural Product therefore its colour can vary. As the name suggests, it is natural, consequently a variation should always be expected. Once the product is laid, it has become used and, after this point, we cannot do anything to help you. Before laying the product, if you are not happy with the product supplied, or with the colour variation, then please do let us know as soon as possible, so that we can do our very best to assist you.

Whether you are a stockist, a contractor, or a retail customer completing your own project, we are always here to help.

Ethical Trading Initiative

Respect for workers worldwide

As a company, we are fully aware of our ethical responsibilities, so choose suppliers in India who are members of the Ethical Trading Initiative (ETI).

The ETI is an alliance of companies, non-governmental organisations (NGOs) and trade unions. It exists to promote and improve implementation of corporate codes of practice which cover supply chain working conditions.

The ultimate goal is to ensure that conditions for workers producing for the UK market meet or exceed international labour standards.

Ethical trade, or ethical sourcing, means the assumption of responsibility by a company for the labour and human rights practices within its supply chain.

As members of the ETI, a supplier's code of conduct is based on the following principles:

- No one should be forced to work, i.e. employment is freely chosen
- Workers have the right to join or form trade unions and should be free to bargain with management
- Working conditions should be free and hygienic
- Child labour should not be used
- Living wages are paid, that is, will be sufficient to meet basic needs and to provide some discretionary income
- Working hours are not excessive
- No discrimination is practised
- Regular employment is provided
- No harsh or inhumane treatment is allowed
